Interests

Programming:

I'm very passionate in coding and building websites. I'd built my first website after completing my grade 10. I got to find my deep interests in creating web pages.

Rubik's Cube:

I was so curious about solving a Rubik's Cube that I got my very own cube when I was 15 years old. Then, I learned how to solve it within a month. I solve an average 3x3 cube in less than a minute.
